for the stars of tomorrow

twinkle

TWINKLE

OUR

little

STARS...

Children

BRING
with them
an
INNOCENT
charm,

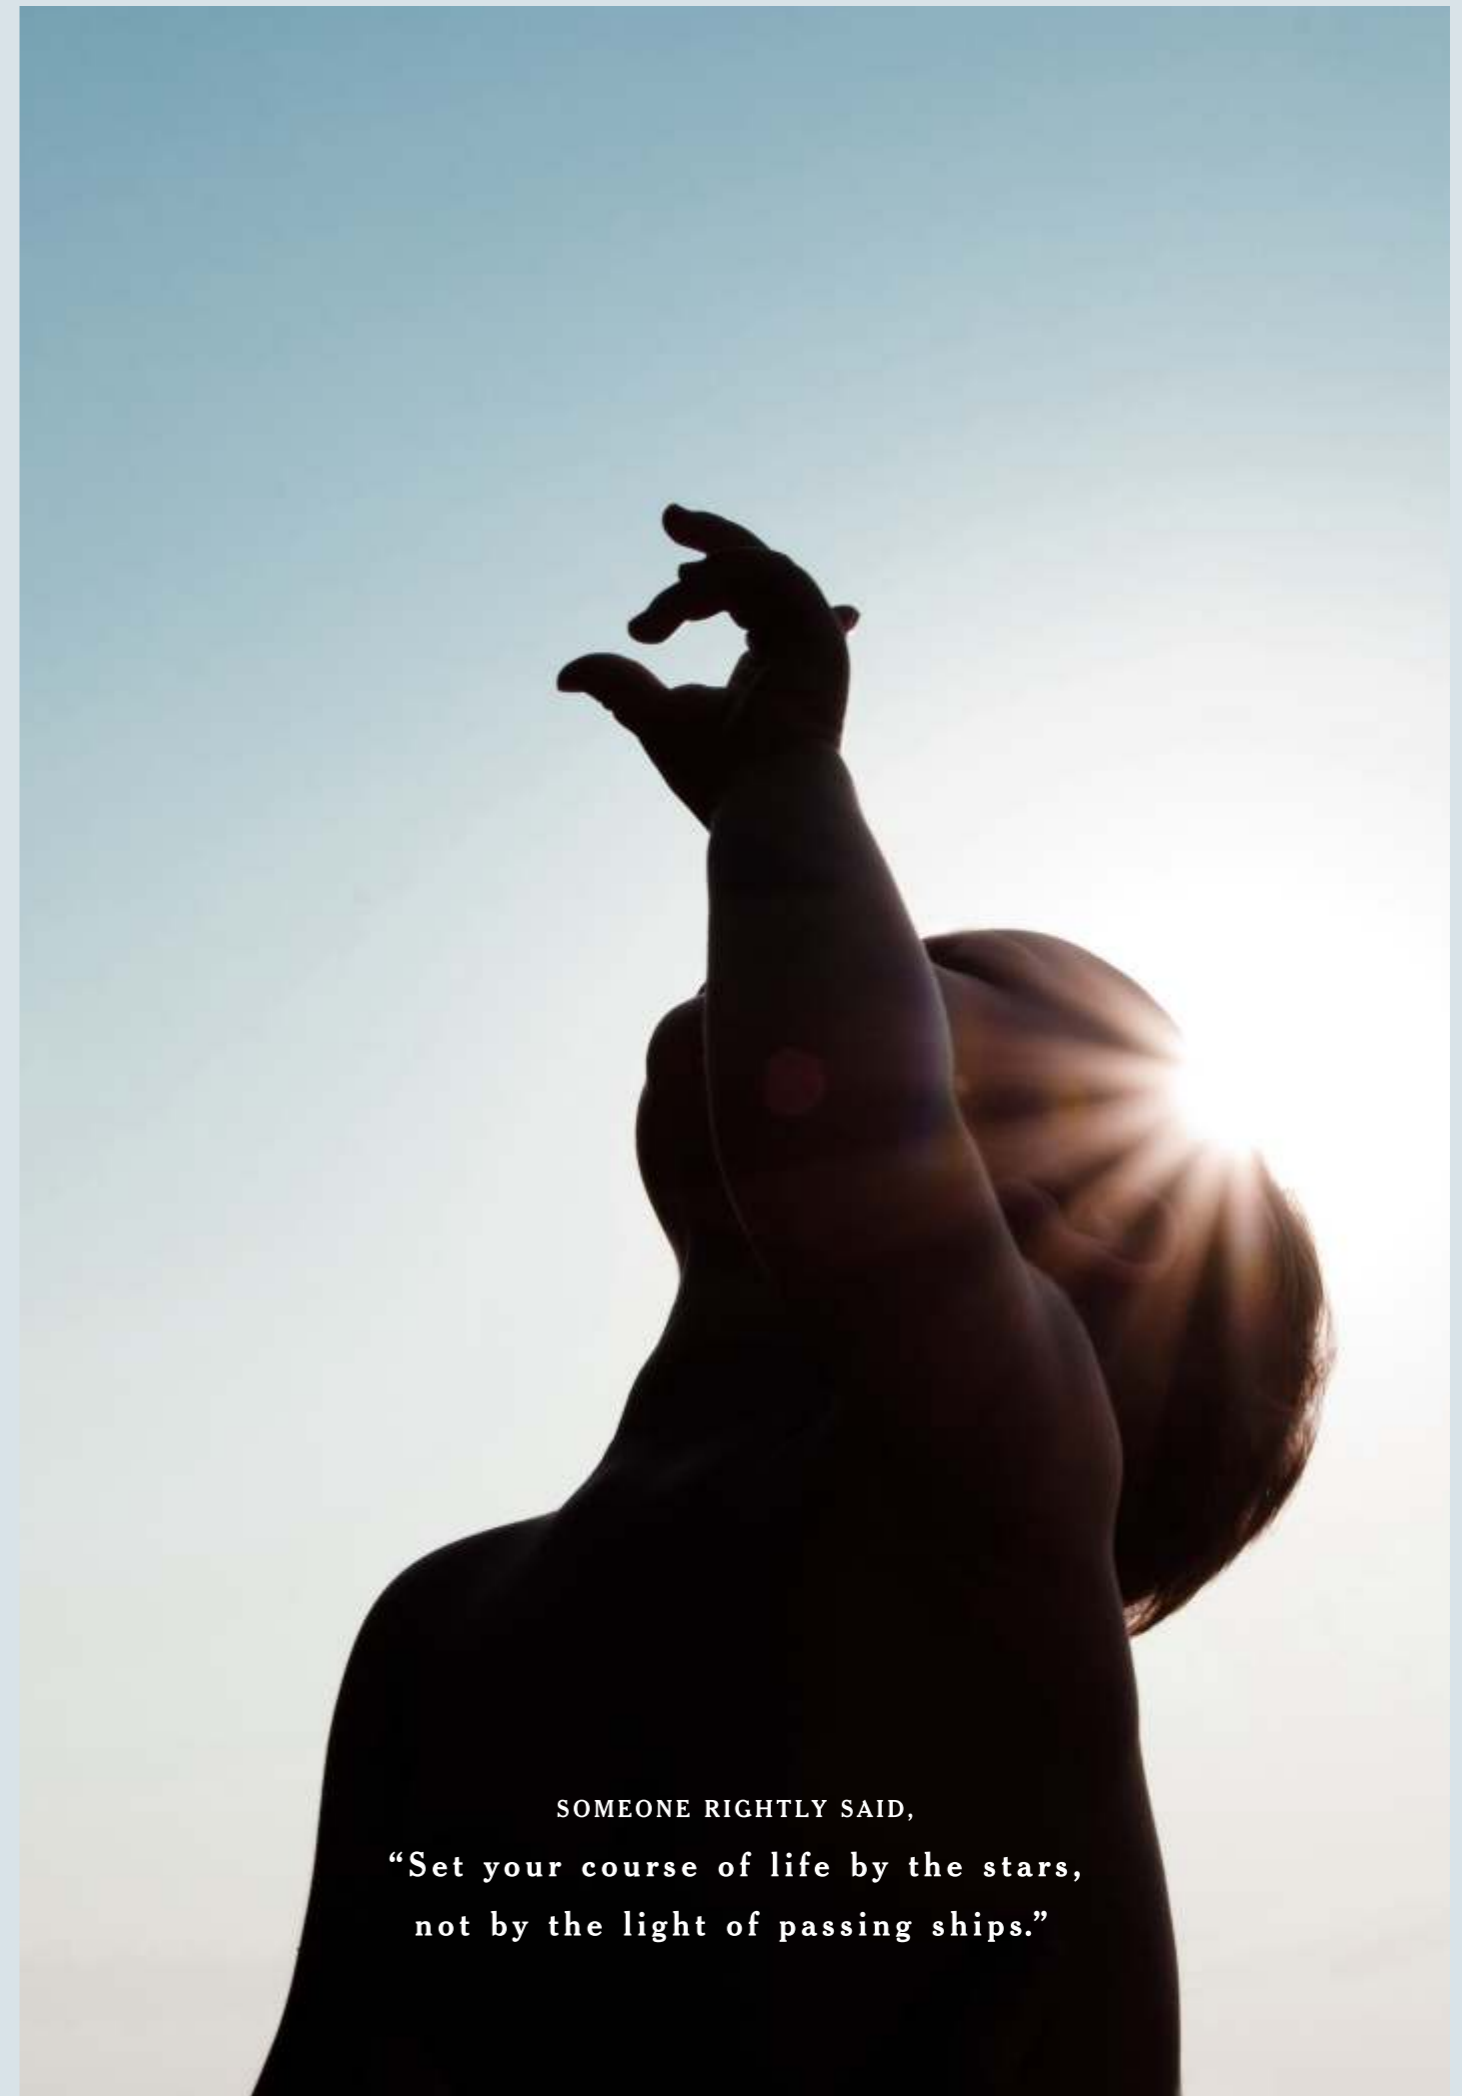

a never ending smile, high levels of curiosity, unmatched mischief, a world full of possibilities and a bright hope for the future. They don't like being taught rather they want learning to illuminate from within. Each child is different and they look at the world with their own eyes. They learn through stories, laugh at themselves, gaze at the fish and wonder at the sky. Wherever there is excitement, children will be present. They will only stay where there is love.

We, at The Sky School

BELIEVE the same.

At
The Sky School
our
vision is

To inspire the children of tomorrow
to dream the impossible,
emit their own light,
follow their own path and
be fearless of the darkness,
only then can we look up to them
with pride & hope.

SOMEONE RIGHTLY SAID,
"Set your course of life by the stars,
not by the light of passing ships."

Children

are

the hands by which

we behold

Heaven.

Children are the most precious possession we have. They are living messages we send to time that we will not see. They make one third of our population and all of

our future. We, at The Sky School understand, nourish, cherish and love these children because we know we can't compromise on them. As they are all we've got.

“Mamma,
is God really

INVISIBLE

or

is it just a
trick he does?”

Children ask questions that a wise man cannot answer. Their curiosity and quest for learning is vast. You may get astonished, surprised and sometimes shaken by their questions. We, at The Sky School encourage them to find their own answers while they

HOP,

SKIP,

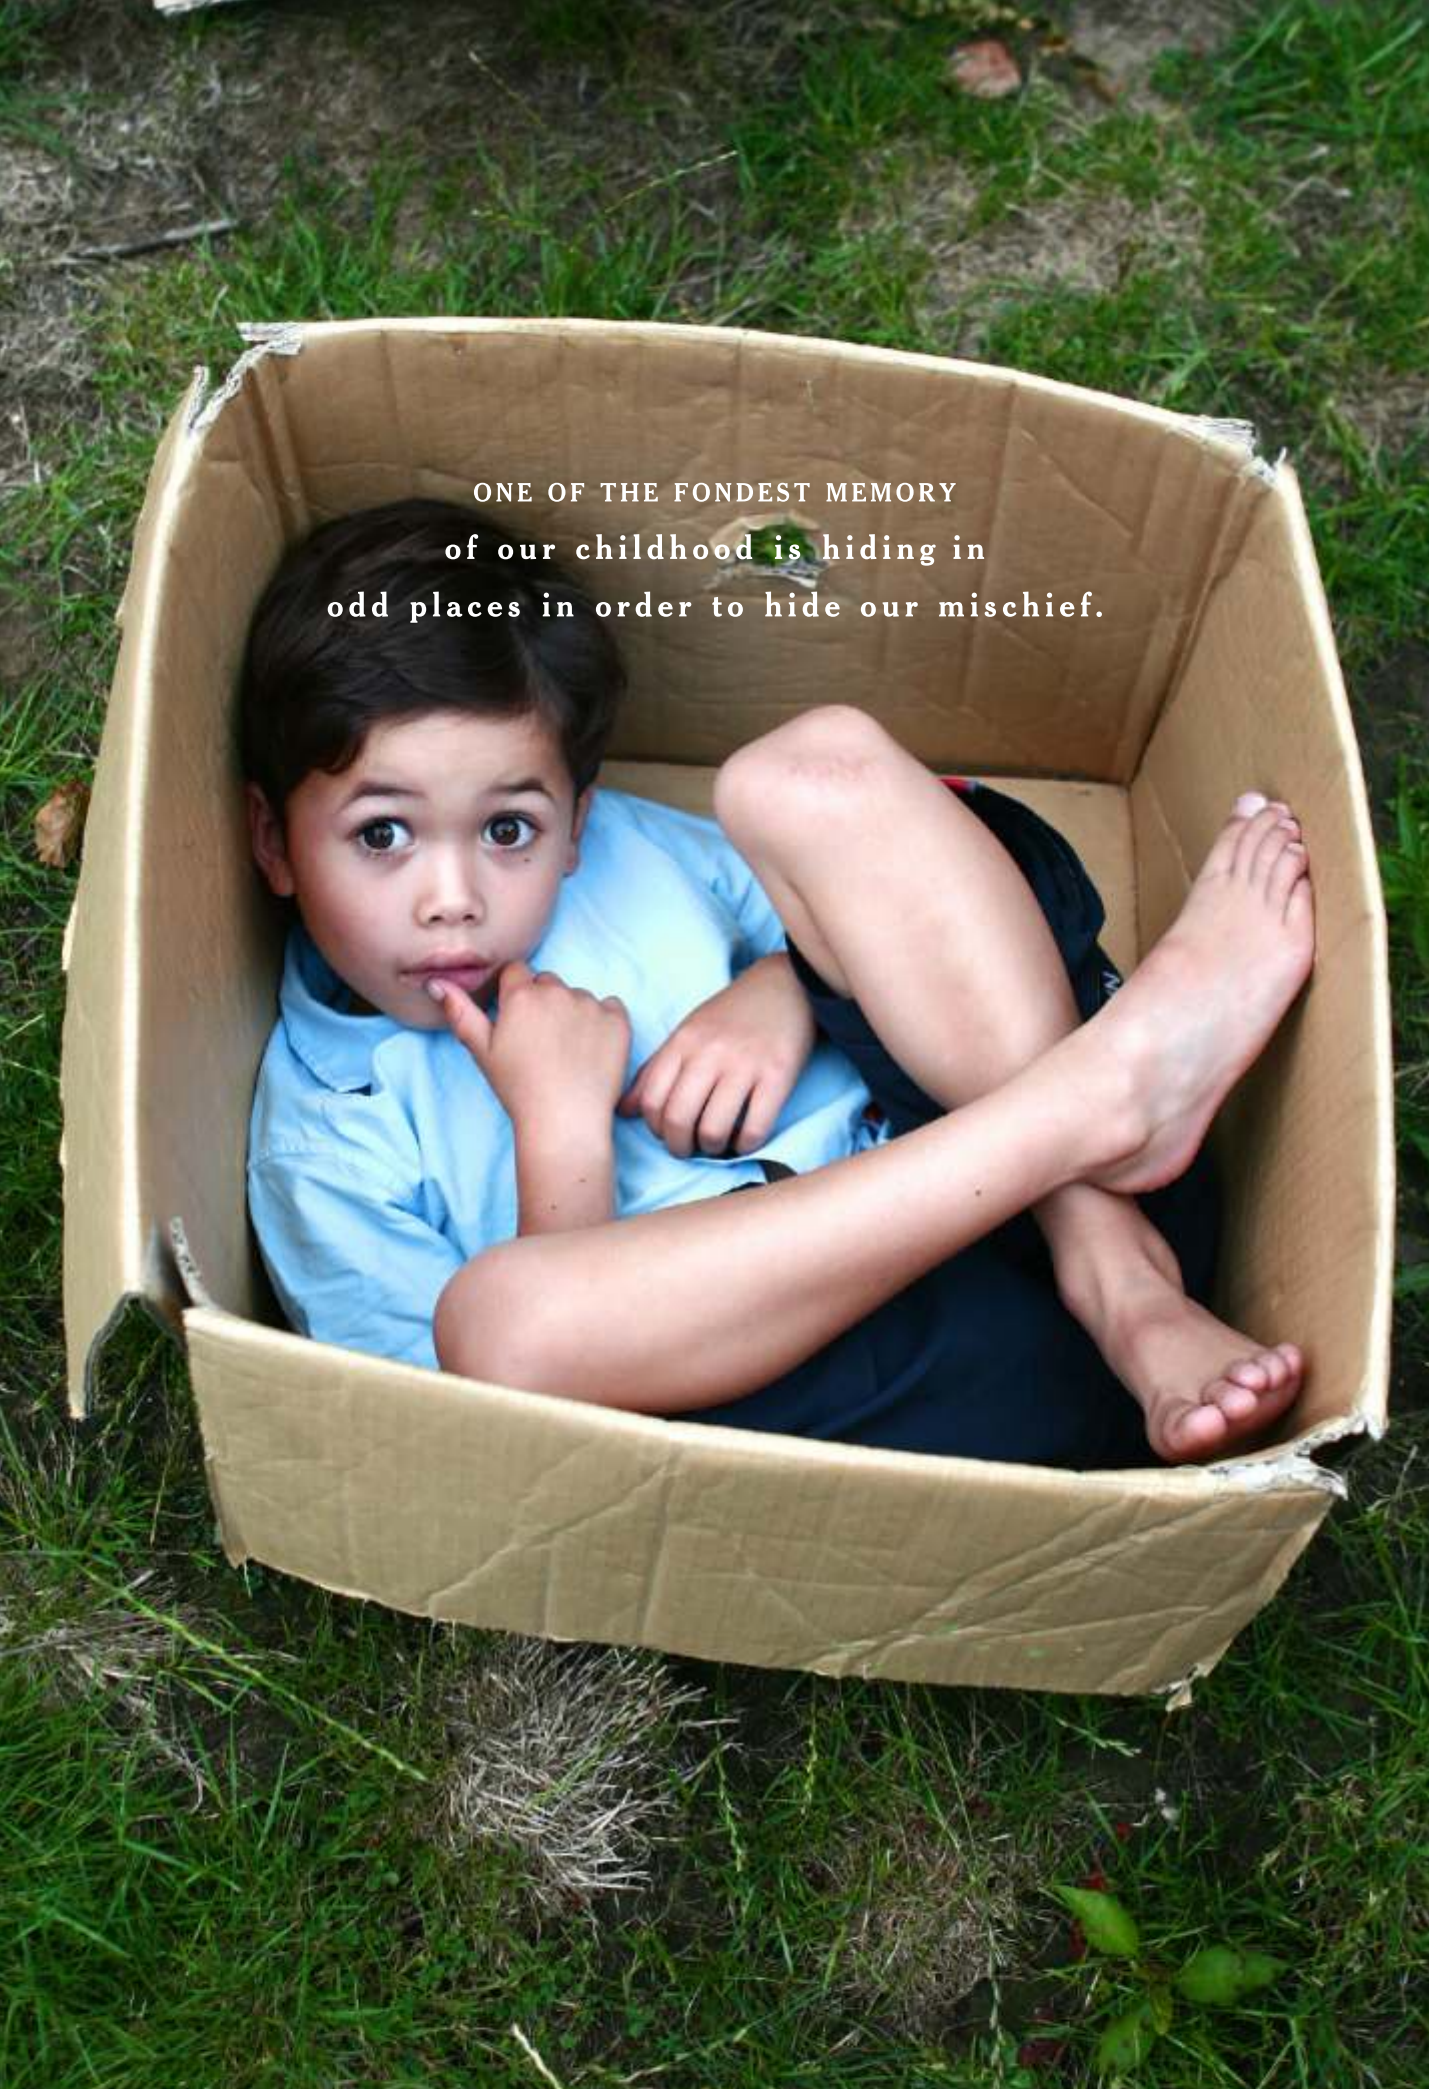

JUMP,

PLAY

and

LEARN.

A young child with dark hair, wearing a light blue shirt and dark shorts, is sitting inside a large, open cardboard box on a grassy lawn. The child is looking directly at the camera with a thoughtful expression, resting their chin on their hand. The box is made of brown cardboard and is placed on a patch of green grass with some dry leaves scattered around.

ONE OF THE FONDEST MEMORY
of our childhood is hiding in
odd places in order to hide our mischief.

You learn so much about
life from your children.
They make you remember
the feeling of being drenched
in the rain, staining clothes
and catching a butterfly.

AT THE SKY SCHOOL,
WE WISH TO BECOME
LEARNERS AGAIN WITH
THESE YOUNG MASTERS
IN ORDER TO *understand*
LIFE BETTER.

YOU SEE

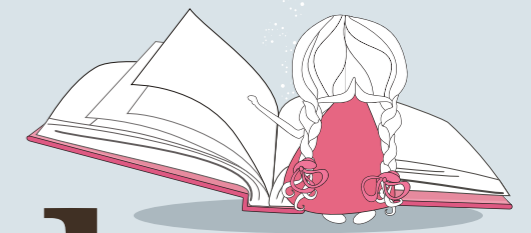

children

every day

but you simply

DON'T

recognize them.

In your urge to make children 'someone' tomorrow, you forget they are 'an individual' today. They possess their own qualities and shortfalls. But each child has no one like him/her in this world.

AT THE SKY SCHOOL, WE UNDERSTAND THAT EACH CHILD IS UNIQUE AND A RARE DESIGN BY NATURE. THEREFORE, WE STRIVE TO CATER TO THE SAME IN A UNIQUE WAY.

AT
THE SKY SCHOOL

WE PUT OUR BELIEFS TO TEST
WITH THESE INQUISITIVE, INNOCENT,
UNMATCHABLE AND FULL OF LIFE CHILDREN
AND FROM THERE WE TURN THESE
CHILDREN INTO

THE
STARS

of
TOMORROW.

YOU

It is said that if you can

CAN

unsettle the minds of the

GET

young and inflame their

VERY

intellect, you are educating.

GOOD

We, at The Sky School

GRADES

continue to believe that if

BUT

children are believed,

STILL

nurtured, loved and provided

NOT

the tools of success by us,

SUCCEED

they will achieve far more

IN

than we can imagine.

LIFE.

We understand that these children when in the making of stars will need different systems, experiential tools and hands on experience.

THEREFORE, WE BRING FORWARD
THE NEW AGE LEARNING PROCESS,
WHICH WE CALL

Empirical Learning.

THE NAME EMPIRICAL LEARNING MEANS

learning

through

OBSERVATION

and

EXPERIENCE.

IT IS A TRANSFORMATION OF KNOWLEDGE
INTO PRACTICE. FOR THE HOLISTIC
DEVELOPMENT OF THE CHILD WE HAVE
PARTITIONED IT INTO **SIX ELEMENTS**.

WE CANNOT ALWAYS BUILD FUTURE FOR OUR CHILDREN BUT WE CAN ALWAYS BUILD CHILDREN FOR THE FUTURE.

AWARENESS

We let children observe their surroundings, people and environment. They are encouraged to undertake age appropriate social and environmental projects. Children learn that their future lies in the resources they have today and the community they live in. Both need nurturing and innovation and here children emerge as torchbearers of a new world.

FACTS ARE NOT SCIENCE AS THE DICTIONARY IS NOT LITERATURE.

EXPERIMENTATION

We let the children experience the power of experimentation. They are facilitated to observe, understand concepts, experiment with new age technology and analyze. The regular practice in the laboratories, class rooms, and out door stimulate their thinking skills, develop self discipline and the spirit of enterprise.

CREATIVITY REQUIRES A LOT OF COURAGE.

CREATIVITY

Creativity is fostered through practical experimentation, dramatization, dance, visual materials and collaborative activities. We ignite pupils' imagination through first hand learning experiences like field visits, contact with creative people, relating learning in the classroom with real life experiences. Children would perform authentic tasks, be responsible, courageous and confident, work in teams and enjoy themselves.

TO SPEAK AND TO SPEAK WELL ARE TWO THINGS.

COMMUNICATION

Through this element children are encouraged to synthesize their thoughts, convert them into expression and then communicate. Children learn to develop control over their thoughts. They are also able to direct themselves in the right way to achieve flawless communication as it is one of the most important aspects of a learned person.

A SPORTS PERSON RUNS WITH HOPE IN HIS/HER HEART AND DREAMS IN HIS/HER HEAD.

PHYSICAL RECREATION

Through this element we cheer children to be active through sports and games, yoga, and other physical and mental activities. They acquire the sportsman spirit practically, to win fairly, the killer instinct, while maintaining healthy body with healthy mind and also the discipline, fairness and unpredictability of our life. They learn that losers quit when they are tired but winners quit when they have won.

IF YOU WISH TO UNDERSTAND TODAY, YOU WILL HAVE TO SEARCH, KNOW AND RESPECT YESTERDAY.

HERITAGE

Through this element they not only learn about their own culture and values but also how they relate to global traditions and values. Children learn that their tradition, culture and values are very important and that's what makes them different from each other yet united. They learn that love, compassion and the sense of duty are universal values which give them the moral compass to embark on any journey anywhere.

THE
SIX ELEMENTS OF
EMPIRICAL
LEARNING

THROUGH EMPIRICAL LEARNING,
WE, AT THE SKY SCHOOL INSTILL IN
CHILDREN THAT THEY HAVE TO BECOME
LIFELONG LEARNERS AS EDUCATION
IS A JOURNEY AND IT NEVER ENDS.

THEY UNDERSTAND THAT THEIR SHINE
IS WHAT WILL MAKE THE WHOLE WORLD
LOOK UP TO THEM.

WE BELIEVE IN MAKING THEM SMART

global
CITIZENS.

And we tell them that there will always be dark shadows but you can put them behind if you turn yourself towards the morning star. We ask them to be responsible as our future lies on their shoulders.

A RED CARPET

AWAITS YOU AT

THE SKY SCHOOL

AS WE ALREADY FEEL HONORED TO MEET THE PARENTS
OF A STAR TO BE. WALK WITH US THROUGH THIS JOURNEY
OF MAKING YOUR CHILD A STAR AND ENJOY THE PRIVILEGES
OF BEING A STAR PARENT.

ADMISSIONS ARE INVITED FOR THE CLASSES PRE-NURSERY
TO THE FIFTH GRADE FOR THE APRIL 2011-2012 SESSION.

To enroll your young one to The Sky School,
call us on 931 600 4000 / 931 700 4000
or simply email us at mystar@theskyschool.com
